1. Introduction

1.1 ABSTRACT:

It is an android based attendance application. In this application user can register themselves for making their attendance on daily based. User is also able fill Visit outside form and start /stop location and check attendance reports on date wise. This application has USER, ADMIN module.

1.2 OBJECTIVE:

1. User Login and Registration
2. User mark attendance and send live location.
3. Able to track live location.
4. View Reports on date wise
5. ADMIN can View in out location Report.

1.3 Scope of Attendance Application

In Scope

- Contactless Attendance mark
- Sharing location on one click
- Time consumption
- Easy to monitor employee work reports and track location.
- Flexibility

 M-TECH INNOVATIONS LTD	Attendance Mark Application	Doc. No: M-Tech II/D&D/FF/20
		Rev. No: 2
		Rev. Date: 21/03/2024
	Project Code: M-Tech II/D&D/21/ HA11	Page 6

Not in Scope:

- *Application developed on android platform, so it will not support for other platforms like iOS, windows etc.*
- System is fully dependent on skilled individuals.

1.4 Software and Hardware Specification

Software Specification

- SQL Server 2019 or above version.
- Android studio version chipmunk (2021.2.1)
- Firebase

Hardware Specification

- Android device with version 5.0 and above

Prerequisite

- All prospective environment
- Internet required to android device.

1.5 Installation Steps

- Install apk from play store
- Give permission of GPS Location and Files
- Now, Application is successfully downloaded

1.6 Reference:

- Mobile Phone Based Attendance System
- Paperless System

2. Functional Specifications

2.1 Introduction

Purpose: *The purpose of this document is to describe all the external requirement for the Attendance mark.*

Scope:

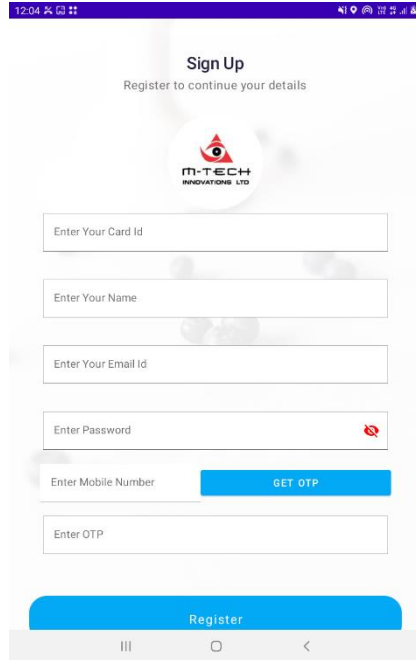

- Attendance marking and report generation becomes easy. In future this system can be implemented to automate most of the attendance mark systems, and it can be designed for cross platform. An attendance Application system **helps to track and store the attendance data and location Data in real-time**. Besides employee and admin attendance
- Attendance (location track) System, Web Based (Cloud Base), System will be divided in to following modules.

1) User

2) Admin

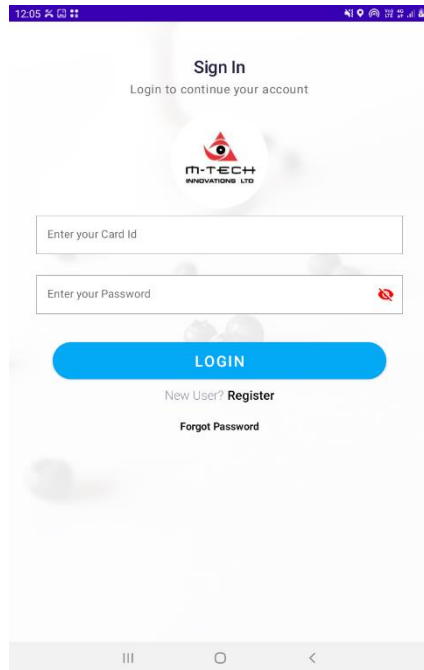

3) User Login Functionality

- I. **Register** - user can Register with company Employee ID, after registration user need to login.

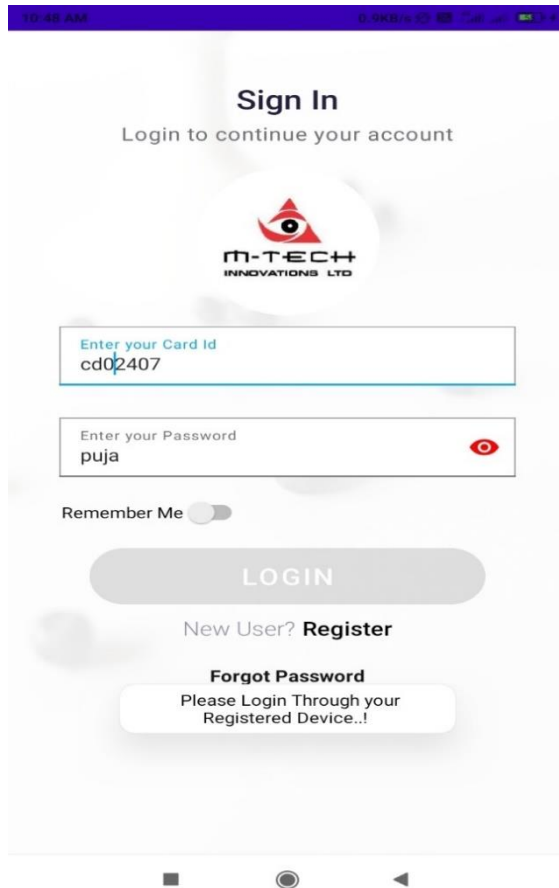

The screenshot shows a mobile application interface for a 'Sign Up' screen. At the top, there is a status bar with the time 12:04 and various icons. Below the status bar, the title 'Sign Up' is displayed, followed by the subtitle 'Register to continue your details'. The M-TECH INNOVATIONS LTD. logo is centered above the input fields. The form consists of several input fields: 'Enter Your Card Id', 'Enter Your Name', 'Enter Your Email Id', 'Enter Password' (with a red eye icon for toggling visibility), 'Enter Mobile Number' (with a blue 'GET OTP' button next to it), and 'Enter OTP'. At the bottom of the form is a large blue 'Register' button. The bottom of the screen shows a standard Android navigation bar with three icons: a square, a circle, and a triangle.

- II. **Login** - Here User Can login with Id and password.

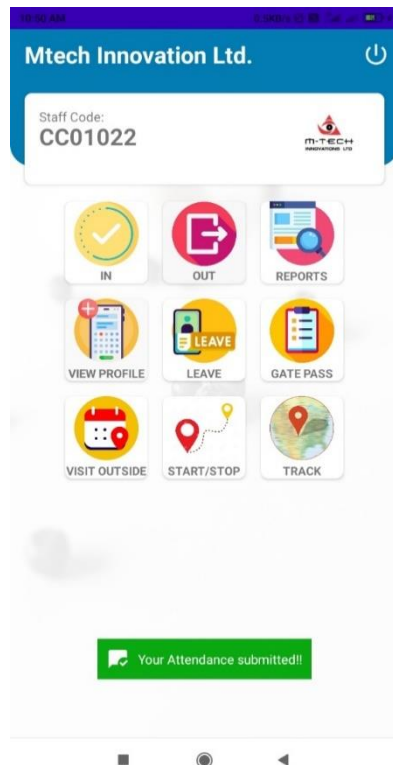

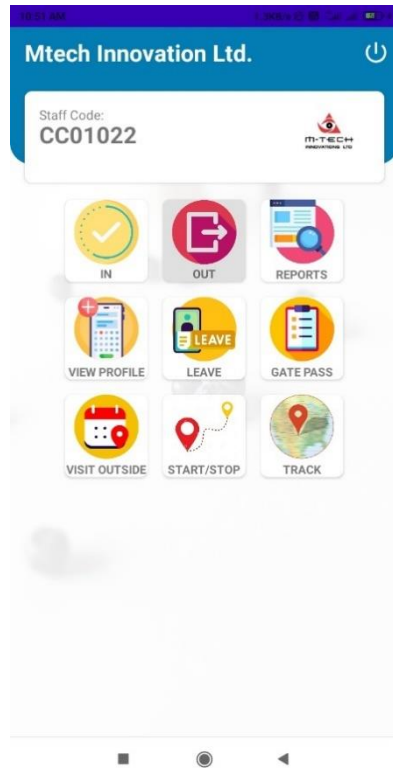

- III. **Login Through Only Registered Device** – Users can only log in with their registered device (the device used during registration) and should not be able to log in as another user.

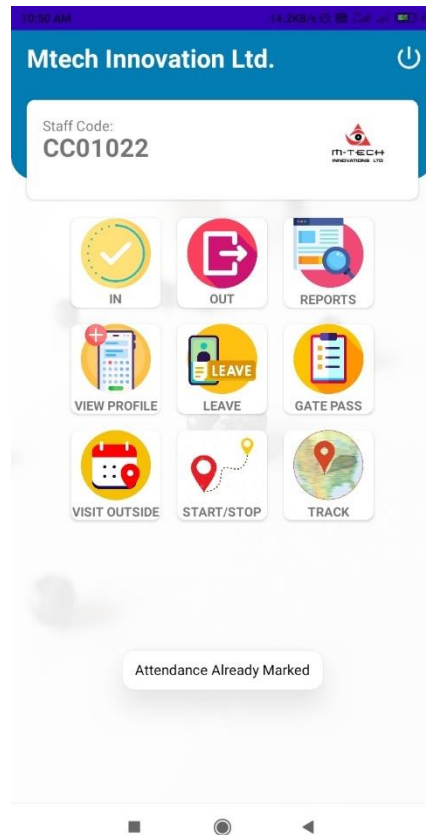

IV. In/Out Marking – After logging in, the user can mark their attendance as either "In" or "Out".

Users are granted two types of rights to mark attendance, which are assigned by the admin:

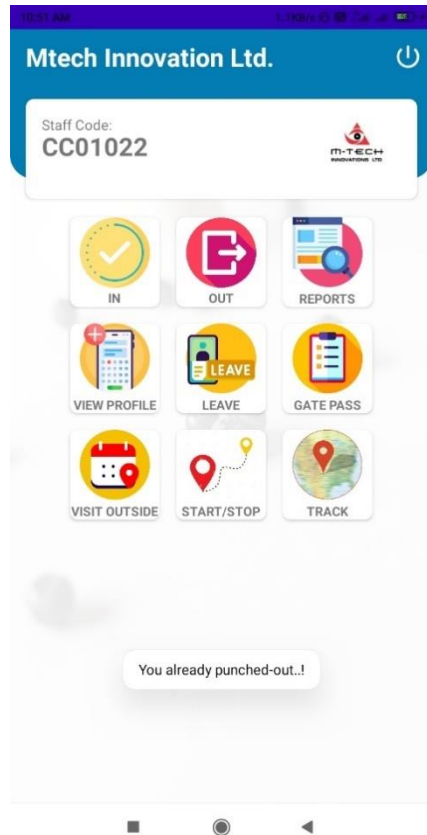

1. Only inside a specified range provided by the admin.
2. From anywhere.

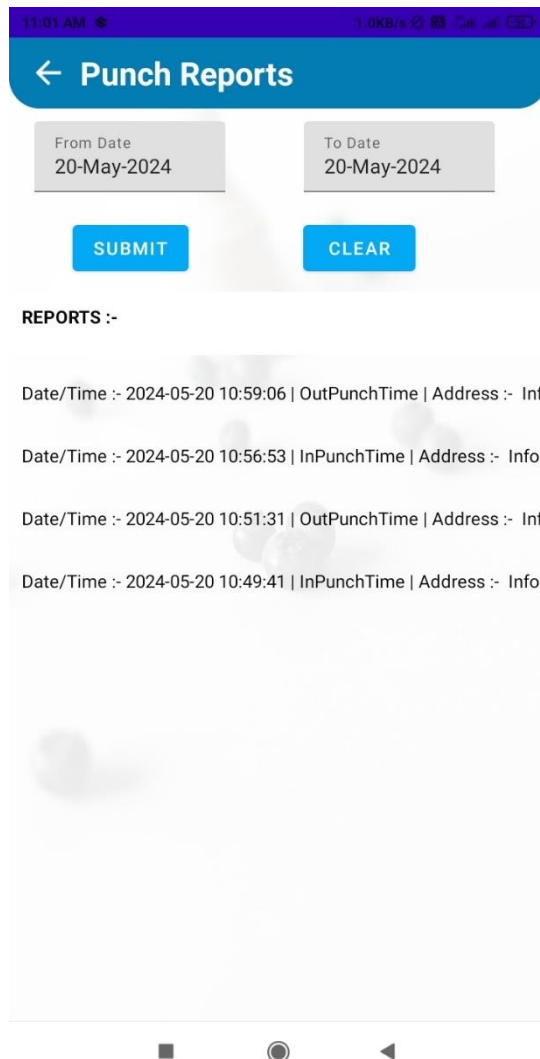

- If a user punched in, then they should be allowed to punch out Not for Punch in, IT Should Show message like “Attendance Already Marked.”

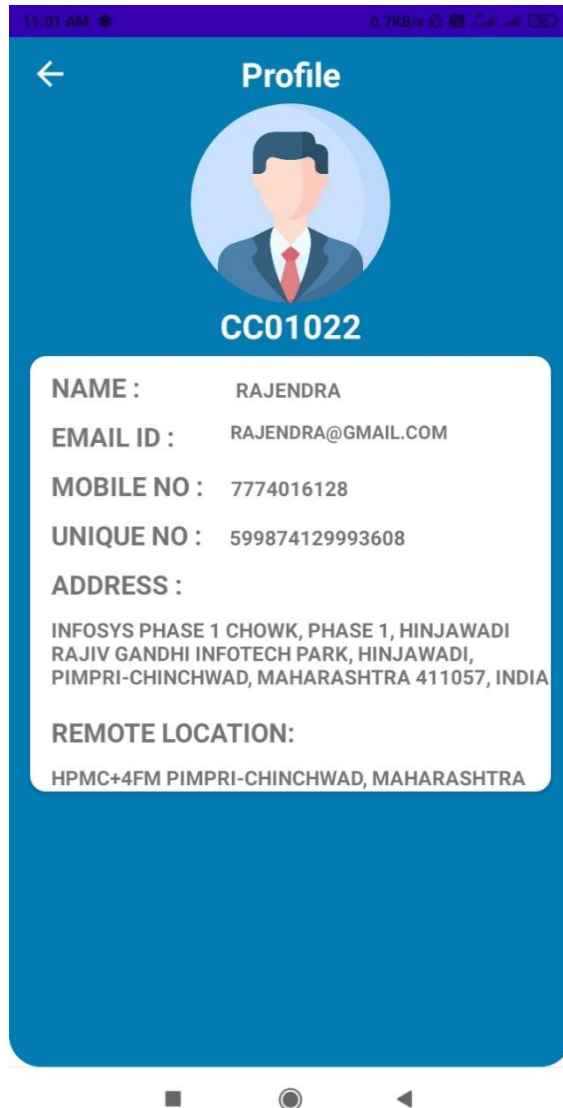

If a user punched Out, then they should be allowed to punch In
Not for Punch Out, IT Should Show message “You Already
punched-out...!”

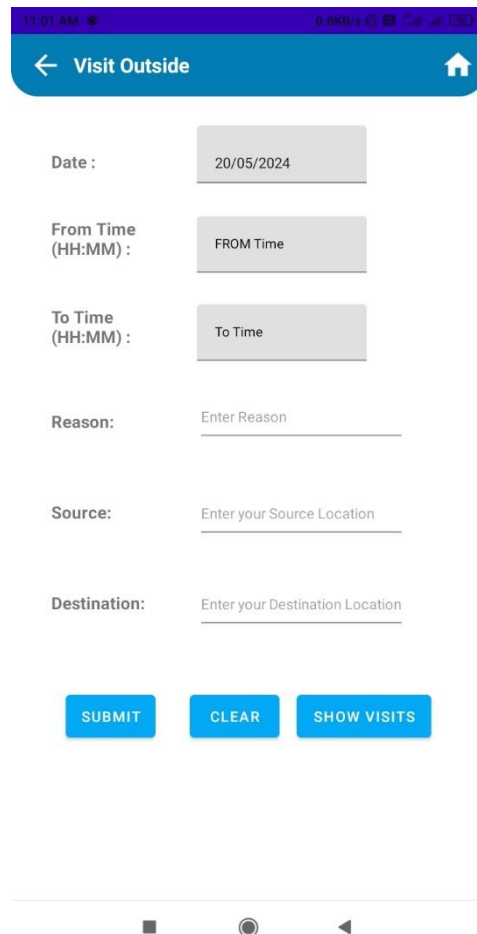

IV. **Report** –User can View IN/Out Report

- V. View Profile** –User Can be able to see profile detail with Unique No which will use for location track and user could edit their contact details if he required.

VI. **Visit Outside** –Here in this module user need to fill Visit outside form for Any date.

The screenshot shows a mobile application interface for a 'Visit Outside' form. At the top, there is a status bar with the time '11:01 AM' and various icons. Below it is a blue header bar with a back arrow, the text 'Visit Outside', and a home icon. The form consists of several input fields: 'Date :' with the value '20/05/2024', 'From Time (HH:MM) :' with the placeholder 'FROM Time', 'To Time (HH:MM) :' with the placeholder 'To Time', 'Reason:' with the placeholder 'Enter Reason', 'Source:' with the placeholder 'Enter your Source Location', and 'Destination:' with the placeholder 'Enter your Destination Location'. Below these fields are three blue buttons: 'SUBMIT', 'CLEAR', and 'SHOW VISITS'. At the bottom of the screen, there is a navigation bar with three icons: a square, a circle, and a triangle.

VII. **Cancel/Edit Visit-** Here in this module user Able to Cancel or Edit Visit

VIII. Start/stop location-Here in this module user need to start location and it will send continues latitude longitude.

The screenshot shows a mobile application interface. At the top, there is a status bar with the time 11:06 AM, a download speed of 0.4KB/s, and a battery level of 55%. Below the status bar is a blue header bar with a back arrow, the text "Start/Stop Visit", and a home icon. The main content area has a label "Select Visit :" followed by a dropdown menu showing "11:05 - 12:30 : hingewadi - katraj". Below this are two buttons: a green "START LOCATION" button and a red "STOP LOCATION" button. Underneath these buttons is a section titled "Metting Remark" (note the typo) which contains a text input field with the placeholder "Enter Meeting Remark" and a green "SUBMIT" button. At the bottom of the form, there is a blue link that says "Fill Minutes Of The Meeting Form..!". The entire form is enclosed in a light green border. At the very bottom of the screen, there are three small navigation icons: a square, a circle, and a triangle.

IX. Fill Minutes of The Meeting Form- Here in This module user can Fill Minutes of the form after Visit completion.

5. System Design and Implementation

Attendance Process Flow:

6. Do's and Don't

Do's –

1. Login only through your registered device.
2. Ensure that your device supports Android version 5.0 and above.
3. Grant GPS and file access permissions.
4. Turn on GPS while creating a visit.
5. Click on the "Start visit" option once the visit is created.
6. After completing the visit, fill out the MOM (Minutes of Meeting) form.

Don't –

1. Don't Turn off GPS once visit started
2. "Once your visit has started, please do not log out of the app. Instead, you can minimize the application, "If you log out, you will need to log in again to end the visit."
3. "Don't start visit when your device battery level is below 20%
